## About Us

C. M. Cleaning Company, Inc. is a commercial and industrial service company founded in 1972.

Our company has been successful since its inception based on the simple, yet often forgotten values of service, quality of workmanship, and competitive pricing. While our areas of service allow us to fully clean and maintain your entire building, we take extra care in training our staff in flooring and carpet care. Our cleaners are detail oriented and possess a sense of urgency and individual customer needs.

Our policies help to create a close working relationship with our customers. We get to

know every corner of your building while working in strict conformity with the specific needs of facility occupants. In our business, experience counts.

The more quality service we provide, the more we learn about our customers' needs and how to serve you better.

We have the size and manpower to service your needs without sacrificing personal attention.

## Real Account Management

We are unique in that the owner of the company personally visits our clients during the cleaning process. We are not a faceless franchise, which gives us the flexibility to be creative and immediately respond to the needs of our clients.
